

# **Clinical Senate Independent Review Panel**

## **What it felt like**

## **A commissioner's view**

**15<sup>th</sup> March 2017**

**Dr Fiona Head**

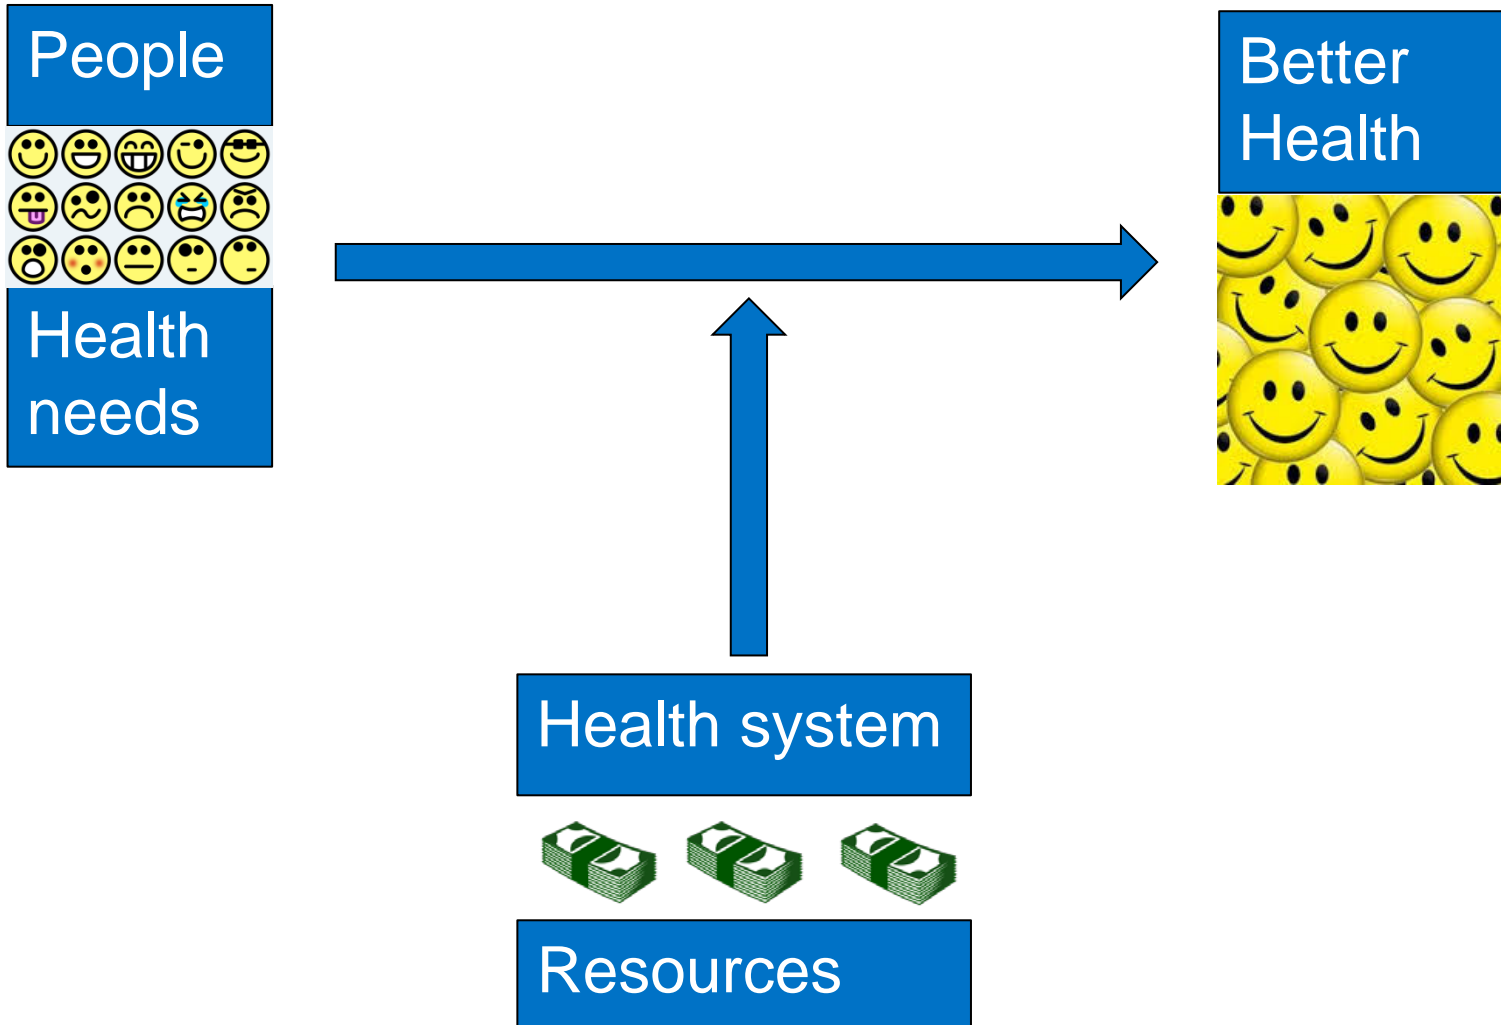

**Associate Director Clinical Outcomes and Population Health**

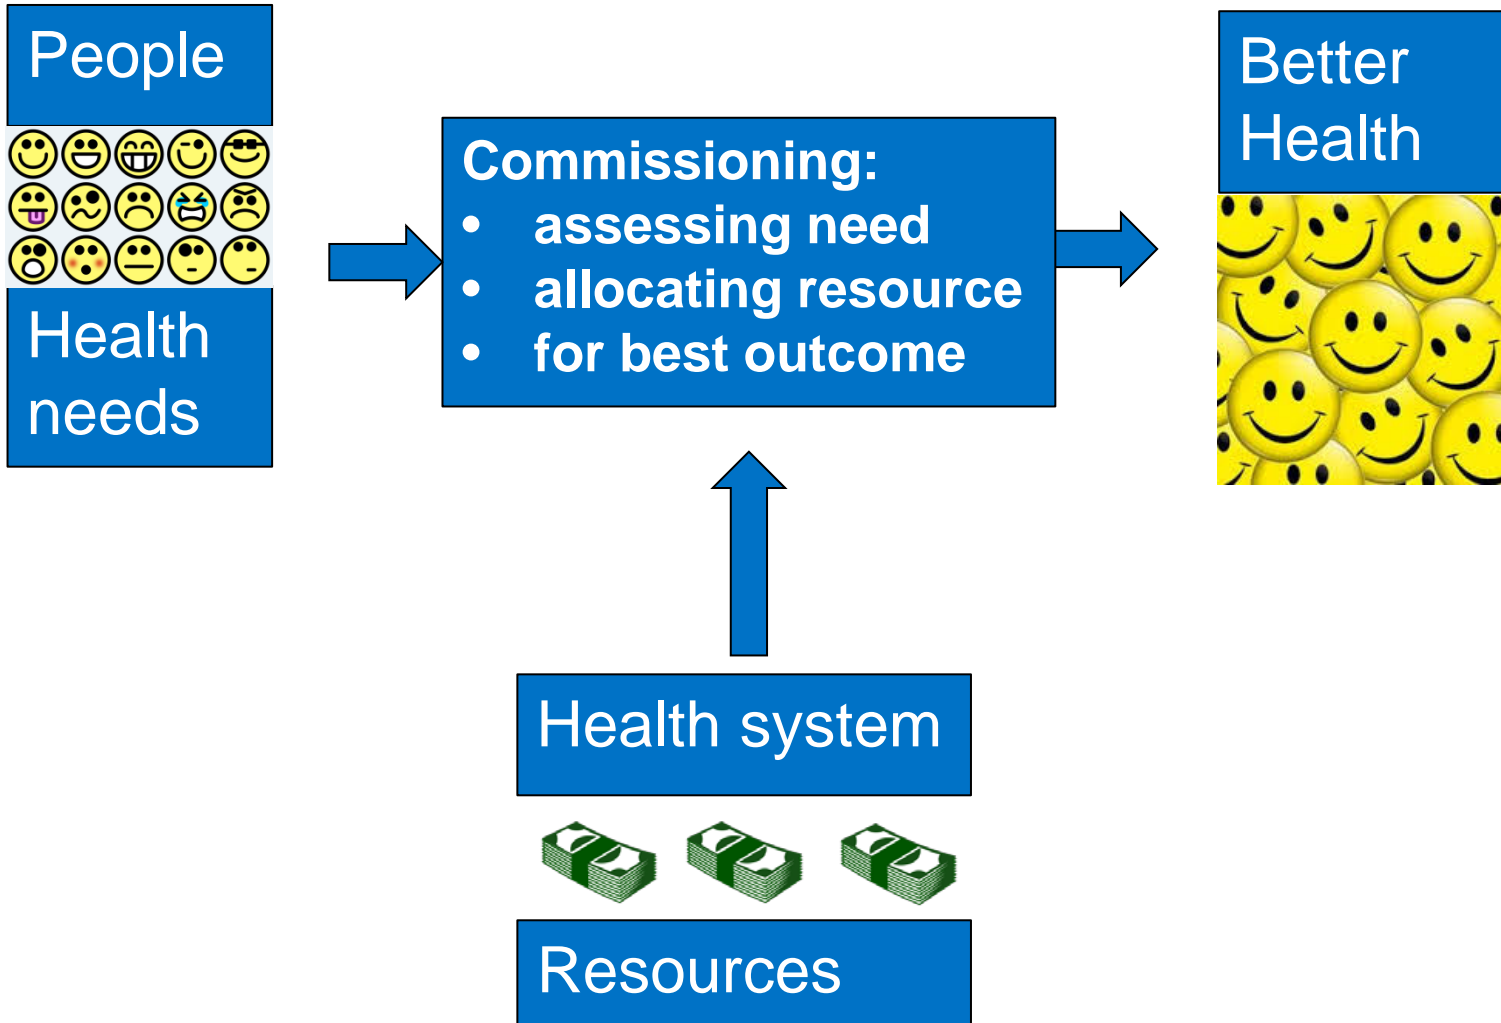

**NHS Cambridgeshire and Peterborough CCG**

***Cambridgeshire and Peterborough  
Clinical Commissioning Group***

# Commissioning is an active process

Resources tend to gravitate

- to where need is less
- to acute care and

away from the “simple hard” changes in prevention and primary care

(Inverse Care Law)

# Clinical Senate Panel felt

- Clinically and patient-centred
- Thorough
  - “Do you really understand the details and context of what you are proposing ? Have you considered need and impact adequately? ”
- Formative
  - “You are going in the right direction- consider these areas to improve...”

***Practical support in pushing the boulder uphill***
